# **Material Safety Data Sheet**

iso-Propyl Alcohol

#### 1. **Product and company identification**

iso-Propyl Alcohol **Product name** 

: PX1830 Product code

: EMD Chemicals Inc. **Supplier** 

480 S. Democrat Rd. Gibbstown, NJ 08027

856-423-6300 Technical Service Monday-Friday: 8:00 -5:00 PM

: Isopropanol; 2-Propanol **Synonym** 

**Material uses** Other non-specified industry: Analytical reagent.

Validation date 6/17/2011.

: 800-424-9300 CHEMTREC (USA) In case of emergency

613-996-6666 CANUTEC (Canada)

24 Hours/Day: 7 Days/Week

### Hazards identification

**Emergency overview** 

FLAMMABLE LIQUID AND VAPOR. VAPOR MAY CAUSE FLASH FIRE.

HARMFUL IF INHALED OR SWALLOWED. CAUSES SEVERE EYE IRRITATION.

MAY BE HARMFUL IF ABSORBED THROUGH SKIN.

MAY CAUSE SKIN IRRITATION.

MAY CAUSE DAMAGE TO THE FOLLOWING ORGANS: RESPIRATORY TRACT.

SKIN, EYES, CENTRAL NERVOUS SYSTEM.

ASPIRATION HAZARD.

Keep away from heat, sparks and flame. Do not breathe vapor or mist. Do not ingest. Do not get in eyes or on skin or clothing. Avoid contact with skin and clothing. Use only with adequate ventilation. Keep container tightly closed and sealed until ready for use.

Wash thoroughly after handling.

: Liquid. [Colorless.] Physical state

**OSHA/HCS** status This material is considered hazardous by the OSHA Hazard Communication Standard (

29 CFR 1910.1200).

Routes of entry : Dermal contact. Eye contact. Inhalation. Ingestion.

Potential acute health effects

: Toxic by inhalation. Vapors may cause drowsiness and dizziness. Inhalation

: Toxic if swallowed. Aspiration hazard if swallowed. Can enter lungs and cause damage. Ingestion

: May be harmful in contact with skin. May cause skin irritation. Skin : Severely irritating to eyes. Risk of serious damage to eyes. **Eves** 

Potential chronic health effects

Carcinogenicity : No known significant effects or critical hazards.

Mutagenicity : No known significant effects or critical hazards. **Teratogenicity** : No known significant effects or critical hazards. **Developmental effects** : No known significant effects or critical hazards.

Fertility effects : No known significant effects or critical hazards.

: May cause damage to the following organs: upper respiratory tract, skin, eyes, central **Target organs** 

nervous system (CNS).

**Medical conditions** 

aggravated by overexposure

: Pre-existing disorders involving any target organs mentioned in this MSDS as being at

risk may be aggravated by over-exposure to this product.

See toxicological information (section 11)

Continued on next page

iso-Propyl Alcohol PX1830 2/8

## Composition/information on ingredients

Name **CAS** number % by weight Isopropyl Alcohol 67-63-0 100

# First aid measures

: Check for and remove any contact lenses. Immediately flush eyes with plenty of water Eye contact for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical

attention immediately.

: In case of contact, immediately flush skin with plenty of water for at least 15 minutes Skin contact

while removing contaminated clothing and shoes. Wash clothing before reuse. Clean

shoes thoroughly before reuse. Get medical attention immediately.

Inhalation : Move exposed person to fresh air. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

Loosen tight clothing such as a collar, tie, belt or waistband. Get medical attention

immediately.

Ingestion : Wash out mouth with water. Do not induce vomiting unless directed to do so by medical

personnel. Never give anything by mouth to an unconscious person. Get medical

attention immediately.

#### 5. Fire-fighting measures

: Flammable liquid. In a fire or if heated, a pressure increase will occur and the container Flammability of the product

> may burst, with the risk of a subsequent explosion. The vapor/gas is heavier than air and will spread along the ground. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Runoff to sewer

may create fire or explosion hazard.

Extinguishing media : Use dry chemical, CO<sub>2</sub>, water spray (fog) or foam.

Not suitable : Do not use water jet.

: Promptly isolate the scene by removing all persons from the vicinity of the incident if Special exposure hazards

> there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water

spray to keep fire-exposed containers cool.

: Decomposition products may include the following materials: Hazardous thermal carbon dioxide decomposition products

carbon monoxide

Special protective Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. equipment for fire-fighters

Special remarks on fire : Vapor may travel a considerable distance to source of ignition and flash back. hazards

#### Accidental release measures 6.

Personal precautions : No action shall be taken involving any personal risk or without suitable training.

> Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put

on appropriate personal protective equipment (see Section 8).

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains **Environmental precautions** and sewers. Inform the relevant authorities if the product has caused environmental

pollution (sewers, waterways, soil or air).

Methods for cleaning up

iso-Propyl Alcohol PX1830 **3/8** 

### 6. Accidental release measures

Spill

: Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see section 13). Use spark-proof tools and explosion-proof equipment. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see section 1 for emergency contact information and section 13 for waste disposal. Dilute with water and mop up if water-soluble or absorb with an inert dry material and place in an appropriate waste disposal container.

### 7. Handling and storage

Handling

: Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use non-sparking tools. Take precautionary measures against electrostatic discharges. To avoid fire or explosion, dissipate static electricity during transfer by grounding and bonding containers and equipment before transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

**Storage** 

: Store in accordance with local regulations. Store in a segregated and approved area. Store in original container, protected from direct sunlight. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

# 8. Exposure controls/personal protection

Ingredient	Exposure limits
Ingredient Isopropyl Alcohol	ACGIH TLV (United States, 2/2010).  TWA: 200 ppm 8 hour(s). STEL: 400 ppm 15 minute(s).  OSHA PEL 1989 (United States, 3/1989).  TWA: 400 ppm 8 hour(s).  TWA: 980 mg/m³ 8 hour(s).  STEL: 500 ppm 15 minute(s).  STEL: 1225 mg/m³ 15 minute(s).  NIOSH REL (United States, 6/2009).  TWA: 980 mg/m³ 10 hour(s).  TWA: 980 mg/m³ 15 minute(s).  STEL: 500 ppm 15 minute(s).  STEL: 500 ppm 15 minute(s).  STEL: 500 ppm 15 minute(s).  STEL: 1225 mg/m³ 15 minute(s).  OSHA PEL (United States, 11/2006).
	TWA: 400 ppm 8 hour(s). TWA: 980 mg/m³ 8 hour(s).

#### Consult local authorities for acceptable exposure limits.

**Engineering measures** 

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. iso-Propyl Alcohol PX1830 4/8

### 8. Exposure controls/personal protection

Hygiene measures

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

#### Personal protection

**Respiratory**: Use a properly fitted, air-purifying or air-fed respirator complying with an approved

standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe

working limits of the selected respirator.

**Hands** : Chemical-resistant, impervious gloves complying with an approved standard should be

worn at all times when handling chemical products if a risk assessment indicates this is

necessary. Recommended: nitrile rubber

Eyes : Safety eyewear complying with an approved standard should be used when a risk

assessment indicates this is necessary to avoid exposure to liquid splashes, mists or

dusts. Recommended: splash goggles

Skin : Personal protective equipment for the body should be selected based on the task being

performed and the risks involved and should be approved by a specialist before handling

this product.

Recommended: lab coat

**Environmental exposure** 

controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### Physical and chemical properties

Physical state : Liquid. [Colorless.]

Flash point : Open cup: 11.85°C (53.3°F)

Auto-ignition temperature : 399°C (750.2°F)

Flammable limits : Lower: 2.3%

Upper: 12.7%

Color : Colorless.

Odor : Characteristic.

Molecular weight : 60.11 g/mole

Molecular formula : C3-H8-O

pH : Not available.

**Boiling/condensation point** : 82.5°C (180.5°F) **Melting/freezing point** : -88.9°C (-128°F)

Relative density : 0.785

tolative deficity

Vapor pressure: Not available.Vapor density: 2.07 [Air = 1]Odor threshold: Not available.

**Evaporation rate** : 1.7 (butyl acetate = 1)

**VOC** : 100 % (w/w)

**Solubility** : Soluble in the following materials: water

iso-Propyl Alcohol PX1830 5/8

### 10. Stability and reactivity

Chemical stability

: The product is stable.

Possibility of hazardous

reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

Hazardous polymerization **Conditions to avoid** 

: Under normal conditions of storage and use, hazardous polymerization will not occur.

: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow vapor to accumulate in low or confined areas.

Materials to avoid

: Highly reactive or incompatible with the following materials: oxidizing materials.

**Hazardous decomposition** products

: Under normal conditions of storage and use, hazardous decomposition products should

not be produced.

Conditions of reactivity

: Highly flammable in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and oxidizing materials.

Vapor may travel a considerable distance to source of ignition and flash back.

Highly explosive in the presence of the following materials or conditions: open flames, sparks and static discharge, heat and oxidizing materials.

Rat

# 13. Disposal considerations

The information presented only applies to the material as supplied. The identification based on characteristic(s) or listing may not apply if the material has been used or otherwise contaminated. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Disposal should be in accordance with applicable regional, national and local laws and regulations.

### 15. Regulatory information

Hazard symbol or symbols :

Risk phrases : R11- Highly flammable.

R36- Irritating to eyes.

R67- Vapors may cause drowsiness and dizziness.

Safety phrases : S7- Keep container tightly closed.

S16- Keep away from sources of ignition - No smoking.

S24/25- Avoid contact with skin and eyes.

S26- In case of contact with eyes, rinse immediately with plenty of water and seek

medical advice.

**International regulations**
