3. Composition/Information on Ingredients

Mixture

Chemical name	Common name and synonyms	CAS number	%
Glycerol		56-81-5	30-60
Polyethylene glycol		25322-68-3	10-30
Isopropanol		67-63-0	3-7
Sulfuric acid, monododecyl ester, compd. with 2,2",2""-nitrilotris[ethanol] (1:1)		139-96-8	1-5

.		·	Ĺ		
Chemical name Amides, coco,	Common name and synonyms	68603-42-9	<u> </u>		
N,N-bis(hydroxyethyl)			0.5-1.5		
Ethanol, 2,2"-iminobis-		111-42-2	0.1-1		
Composition comments	US GHS: The exact percentage (concentration) secret in accordance with paragraph (i) of §191		withheld as a trade		
	4. First Aid Measures				
Inhalation	If inhaled: Remove person to fresh air and keep center/doctor if you feel unwell.	comfortable for breathing	. Call a poison		
Skin contact	If on skin (or hair): Take off immediately all cont	-			
Eye contact	If in eyes: Rinse cautiously with water for sever easy to do. Continue rinsing. If eye irritation per If availated: Rinse mouth Do NOT induce you	rsists: Get medical advice/a	attention.		
Ingestion Most important	If swallowed: Rinse mouth. Do NOT induce von Causes serious eye irritation. Symptoms may ir				
symptoms/effects, acute and delayed	blurred vision.	icidae stinging, tearing, rec	iness, swening, and		
Indication of immediate medical attention and special treatment needed	Provide general supportive measures and treat Symptoms may be delayed.	symptomatically. Keep vic	tim under observation.		
General information	Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Keep away from sources of ignition. No smoking. Avoid contact with eyes, skin and clothing. Take off all contaminated clothing immediately. Wash contaminated clothing before reuse. Keep out of reach of children.				
	5. Fire Fighting Measures	5			
Suitable extinguishing media	Foam. Water fog. Carbon dioxide (CO2).				
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.				
Specific hazards arising from the chemical	Vapors may form explosive mixtures with air. Vapors may travel considerable distance to a source of ignition and flash back. During fire, gases hazardous to health may be formed. Firefighters should wear a self-contained breathing apparatus.				
Special protective equipment and precautions for firefighters	Self-contained breathing apparatus and full protective clothing must be worn in case of fire.				
Fire-fighting equipment/instructions	In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.				
Specific methods	Use standard firefighting procedures and consid	der the hazards of other inv	olved materials.		
General fire hazards Hazardous combustion	Flammable liquid and vapor. May include and are not limited to: Oxides of nitrogen. Hydrogen chloride. Oxides of carbon.				
products					
Explosion data Sensitivity to mechanical impact	Not available.				
Sensitivity to static discharge	Not available.				
	6. Accidental Release Measu	ures			
Personal precautions, protective equipment and emergency procedures	Keep unnecessary personnel away. Keep peop low areas. Eliminate all ignition sources (no sm Do not touch damaged containers or spilled ma clothing. Ventilate closed spaces before enterin significant spillages cannot be contained. For p	oking, flares, sparks, or fla aterial unless wearing appro ng them. Local authorities s	mes in immediate area). opriate protective hould be advised if		
Methods and materials for containment and cleaning up	Eliminate all ignition sources (no smoking, flare combustibles (wood, paper, oil, etc.) away from against static discharge. Use only non-sparking risk. Dike the spilled material, where this is poss Use a non-combustible material like vermiculite into a container for later disposal. Never return surface thoroughly to remove residual contamir water. Prevent entry into waterways, sewer, bas reduce vapors or divert vapor cloud drift. For wa	a spilled material. Take pred tools. Stop the flow of mat sible. Cover with plastic sh e, sand or earth to soak up spills in original containers nation. Following product re sements or confined areas	cautionary measures terial, if this is without eet to prevent spreading the product and place for re-use. Clean ecovery, flush area with . Use water spray to		
Environmental precautions	Avoid discharge into drains, water courses or o	nto the ground.			

7. Handling and Storage

Precautions for safe handling	Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not handle, store or open near an open flame, sources of heat or sources of ignition. Protect material from direct sunlight. Take precautionary measures against static discharges. All equipment used when handling the product must be grounded. Use non-sparking tools and explosion-proof equipment. Vapors may form explosive mixtures with air. Avoid breathing vapors or mists of this product. Use only with adequate ventilation. Avoid prolonged exposure. Wear appropriate personal protective equipment. Avoid contact with eyes, skin and clothing. When using do not eat or drink. Wash thoroughly after handling. Keep container tightly closed.
Conditions for safe storage, including any incompatibilities	Keep away from heat, sparks and open flame. Prevent electrostatic charge build-up by using common bonding and grounding techniques. Store in a cool, dry place out of direct sunlight. Store in a well-ventilated place. Keep in an area equipped with sprinklers. Keep out of reach of children. Store locked up. Store away from incompatible materials (see Section 10 of the SDS).

8. Exposure Controls/Personal Protection

Occupational exposure limits US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000) Form Components Value Type Glycerol (CAS 56-81-5) PEL 5 mg/m3 Respirable fraction. Total dust. 15 mg/m3 Isopropanol (CAS 67-63-0) PEL 980 mg/m3 400 ppm **US. ACGIH Threshold Limit Values** Value Form Components Туре Ethanol, 2,2"-iminobis-Inhalable fraction and TWA 1 mg/m3 (CAS 111-42-2) vapor. Isopropanol (CAS 67-63-0) STEL 400 ppm TWA 200 ppm **US. NIOSH: Pocket Guide to Chemical Hazards** Components Туре Value Ethanol. 2.2"-iminobis-TWA 15 mg/m3 (CAS 111-42-2) 3 ppm Isopropanol (CAS 67-63-0) STEL 1225 mg/m3 500 ppm TWA 980 mg/m3 400 ppm US. AIHA Workplace Environmental Exposure Level (WEEL) Guides Components Value Form Туре Polyethylene glycol (CAS TWA 10 mg/m3 Particulate. 25322-68-3) **Biological limit values ACGIH Biological Exposure Indices** Components Value Determinant Specimen Sampling Time Isopropanol (CAS 67-63-0) 40 mg/l Acetone Urine * - For sampling details, please see the source document. Appropriate engineering Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, controls or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Individual protection measures, such as personal protective equipment Chemical goggles are recommended. Eye/face protection Skin protection Rubber gloves. Confirm with a reputable supplier first. Hand protection As required by employer code. Other If engineering controls do not maintain airborne concentrations below recommended exposure **Respiratory protection** limits (where applicable) or to an acceptable level (in countries where exposure limits have not

been established), an approved respirator must be worn.

Thermal hazards **General hygiene** considerations

Not applicable.

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and Chemical Properties

Appearance	Liquid
Physical state	Liquid.
Form	Liquid.
Color	Clear
Odor	Isopropanol
Odor threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	unknown
Pour point	Not available.
Specific gravity	1.1 - 1.15
Partition coefficient (n-octanol/water)	Not available.
Flash point	102.2 °F (39.0 °C)
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable.
Upper/lower flammability or expl	losive limits
Flammability limit - lower (%)	Not available.
Flammability limit - upper (%)	Not available.
Explosive limit - lower (%)	Not available.
Explosive limit - upper (%)	Not available.
Vapor pressure	Not available.
Vapor density	Not available.
Relative density	Not available.
Solubility(ies) Not a	available. Auto-
ignition temperature No	ot available.
Decomposition temperature	Not available.
Viscosity	Not available.
	10. Stability and Reactivity
Reactivity	The product is stable and non reactive under normal conditions of use, storage and transport.
Possibility of hazardous reactions	Hazardous polymerization does not occur.
Chemical stability	Stable under recommended storage conditions.
Conditions to avoid	Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the

Incompatible materials Hazardous decomposition products

11. Toxicological Information

Routes of exposure

Eye, Skin contact, Inhalation, Ingestion.

flash point. Do not mix with other chemicals.

Strong oxidizing agents. Isocyanates. Chlorine.

Information on likely routes of exposure

Expected to be a low ingestion hazard. Ingestion

Inhalation Prolonged inhalation may be harmful.

Skin contact May cause irritation.

US ACGIH Threshold Limit Values: Skin designation

Ethanol, 2,2"-iminobis- (CAS 111-42-2)

IV Can be absorbed through the skin.

May include and are not limited to: Oxides of nitrogen. Hydrogen chloride. Oxides of carbon.

Eye contact	Causes serious eye irritation.	002	_000
Symptoms related to the physical, chemical and toxicological characteristics	Symptoms may include stinging, tear	ring, redness, swelling, and blurred vision.

Fish	LC50	Atlantic salmon (Salmo salar)	> 1000 mg/l, 96 hours	
Persistence and degradability	No data is a	available on the degradability of this product.		
Bioaccumulative potential	No data ava	ailable.		
Mobility in soil	No data available.			
Mobility in general	Not availab	e.		
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.			
		13. Disposal Considerations		
Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. This material and its container must be disposed of as hazardous waste. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.			to
Local disposal regulations	Dispose in a	accordance with all applicable regulations.		
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.			Э
Waste from residues / unused products		ainers or liners may retain some product resid d of in a safe manner (see: Disposal instruction		ıst
Contaminated packaging	Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container i emptied.			is
